

A detailed outdoor kitchen setup featuring a large stainless steel grill with its lid open, revealing food cooking inside. The grill is mounted on a stone wall with wooden cabinets below it. To the right of the grill is a countertop with a sink and a cutting board. On the countertop, there are various items including a potted plant, a tray of bread, a large pot, and a plate of food. The background shows more stone walls and potted plants. The overall scene is set in a garden or patio area.

CABINETRY

Beyond Stainless Steel

In an industry where your choices for outdoor cabinetry are stainless steel and; more stainless steel, the idea of solid wood cabinetry for the outdoor room is truly refreshing. It might even be considered *rebelous* if it weren't such a natural progression whose time is long overdue. Pacific Teak Millworks is unique in our goal to bring the rich warmth and beauty of solid wood cabinetry to outdoor living. Whether your vision includes a custom outdoor kitchen, beverage bar, outdoor living room, or entertainment area, our solid teak cabinetry will make it feel like home. We offer a distinctive, complete line of solid teak outdoor cabinetry in 3 classic choices of door and drawer styles, with beauty, quality, features and benefits that nothing in today's outdoor living market can match.

Why Teak

The quick answer is that it's the only serious choice for outdoor wood products. For centuries, teak has been prized by shipbuilders and outdoor furniture makers alike due to its beauty in color and grain, strength, ability to withstand any weather, and for its resistance to decay and insect damage. Teak oil, naturally occurring in teak, is highly resistant to attack by mold, fungi, wood rot and insects. Teak also contains high silica content, which allows it to weather the elements. Teak wood will last a good 75 to 100 years virtually unaffected if left unprotected outdoors, and is the only wood that can make this claim. As a woodworking material, Teak's grain pattern and patina make it one of the world's most beautiful hardwoods and considered by woodworkers to be of the highest quality. Teak is renowned for its tensile strength and straight grain which resist warping and shrinkage, making it one of the few hardwoods strong and stable enough for solid wood doors and cabinet fabrication. When it comes to color, teak wood is famous for it's natural, honey-gold tone which is commonly enhanced with oil and sealers. However, since teak ages so beautifully, many prefer the rich silver-grey patina of fine, naturally aged teak.

Choices...

When you see a Pacific Teak Millworks outdoor kitchen, something besides the obvious beauty of the wood appeals to you. As opposed to randomly sized stainless steel boxes scattered around the grill island, our cabinetry shares uniform sizing for the clean, coordinated look of a custom kitchen. As with any professional kitchen design, you decide which cabinets you want, then you choose the door and drawer styles for your own custom look. But the choices don't stop there: We also offer a variety of convenient accessories to maximize the function of your custom outdoor room. And since our cabinets are 100% solid wood, you also have the option of staining them to match any natural materials or decor, and finish them off with your choice of cabinet hardware. Finally, Pacific Teak Millworks doors and drawers are easily removable and interchangeable, using the best quality, quick release, pressure fit hinges and glides. This means easy cleaning, maintenance, or even replacement if you get in the mood to change your design.

Quality Craftsmanship

Our cabinetry is crafted using 100%solid, kiln dried, certified A/ B grade teak. All components are fabricated using state of the art CAD manufacturing machinery for exact, precision fit, then hand assembled and fine sanded to a furniture quality finish. Construction is glued mortise and tenon, for the highest quality and strength. Doors and drawers include solid 1" thick frames inset into the beveled outer flange for a clean, professional, high end appearance. Door panels use a floating design, while drawer faces feature double front, tongue and groove construction. We also include PVC drawer bottoms for a lifetime of easy cleanup and durability that will never require maintenance. To complement our beautiful teak cabinetry, we use only Blum® concealed soft/ self closing European door hinges, premium, full extension self-closing drawer runners and stainless steel pull handles. All teak products are backed by a 10-year limited warranty. Drawer runners are guaranteed for 5 years, and door hinges to the original owner for as long as they have them.

Features & Benefits

- Attractive alternative to stainless steel
- Solid A/ B grade teak construction
- Choice of door and drawer styles
- Inset doors and drawers
- Solid 1" thick door & drawer frames

Model Lineup

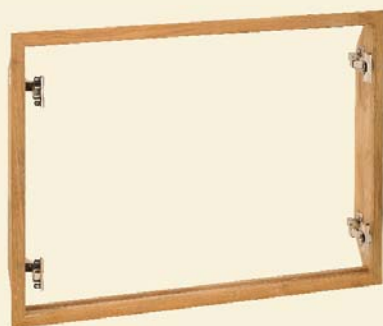

Pacific Teak Millworks “Common Chassis” product line is a modular, component-based program in which the door frames are packaged separately from the doors; and drawer boxes separately from the drawer faces. This gives the customer the option of three distinctive door/ drawer styles that can be used on a single cabinet chassis. All installation hardware is packaged with the chassis’.

ACCESS DOOR CHASSIS’

Single and Double Access Door Chassis features solid wood mounting flanges with beveled outer frame for a clean, attractive look. They accept any of our 3 distinctive styles of doors, and feature Blum Clip Top®, soft close hinges for smooth, solid operation. All installation hardware is packaged with the chassis’.
