

PRODUCT SUMMARY

Pacific Teak Millworks outdoor cabinetry insert program is a modular, component-based system in which the door frames are packaged separately from the doors; and drawer boxes separately from the drawer fronts. This "Common Chassis" approach offers the customer three distinctive door/ drawer style options that can be paired with, or mix-matched to each chassis. This program maximizes choices and flexibility for the customer and provides them the opportunity to create a truly custom outdoor kitchen, beverage bar, outdoor living room, or entertainment area.

All our products feature solid teak construction for outstanding outdoor quality and durability. Door designs are inset with a beveled outer flange for a clean, attractive look and simple installation. They feature premium Blum® Clip Top, soft/ self closing hinges for outstanding operation, and easy door installation and maintenance. Drawers are also inset with beveled flange and feature premium self/ soft close undermount drawer glides. Drawers also include an exclusive PVC bottom for additional durability and easy cleanup.

ACCESS DOOR AND STORAGE CHASSIS'

18" Single Door Chassis.

List Price: **\$185.00**

Our 18" Single Access Door Chassis is the obvious solution for access to bar sinks, side burners, and other small, built-in appliances. It is reversible for use as either a left or right side hinge installation and accommodates any of our 3 distinctive styles of 16" doors.

CARING FOR TEAK

About Teak

Teak is a dense, coarse, close-grained hardwood. It contains high levels of resinous oils that make it naturally resistant to moisture, repellent to insects, and impervious to the drying effects of weather including hot sun, rain, frost and snow. Teak also contains silica, which creates a density in the wood that make it resistant to mold and fungal decay, water, rotting, warping, shrinking, swelling and many damaging chemicals. Teak will not cause metals it comes in contact with to rust or corrode, and it will last a good 75 to 100 years virtually unaffected when left unprotected outdoors. Teak is the only wood that can make these claims. No other wood compares to teak regarding its durability, elegance, stability and low maintenance; making it the top choice for shipbuilders and outdoor furniture makers alike worldwide for centuries. Over time, teak gradually changes color from the golden honey color to the silver-grey patina which distinguishes finely aged, outdoor teak. After a while this silver-grey patina progresses to a darker grey- greenish look if it remains untreated.

Caring for Teak

One of the greatest features of quality teak wood is that it requires very little maintenance and ages gracefully. If you appreciate the natural color of aged teak, then all you really have to do to keep it looking good is give it an occasional cleaning. A good rinse once or twice a month with a garden hose and wipe down with a towel is plenty in most cases. If you prefer the golden color of new teak, more regular cleanings will maintain much of the original hue. You can also treat teak wood with a teak protector or sealer. This will not extend the life of the wood, but it will preserve the golden honey tone that many people love. Oiling teak will also preserve teak's golden color, but starts a maintenance regimen that involves cleaning and re-oiling every 3 months to 1 year. Regular cleanings are important to remove contaminants from the wood which can grow mold or fungus and eventually damage the exterior of the wood. If you notice little dark spots on the wood's surface, clean them as soon as possible. In a harsher environment, or when cleaning has been neglected, a light scrub with a teak cleaner or mild dish soap and clean water with a soft, nylon bristle brush is all it takes. We do not recommend using a pressure washer to clean our teak cabinetry, but it can be done as long as you do so very carefully and are aware that too much pressure can damage the surface of the wood. Use only low pressure, a wide spray nozzle, and keep the tip at least 12" away from the teak.

A Note About Color Staining

Wood stains are intended to be permanent. Once you stain teak, you can't un-stain it. In other words, you cannot return to the natural golden brown or silver-grey color without numerous sandings. If you choose to stain teak after it has turned silver-grey, you must first sand it before applying stain.

A Note About Oiling

The natural oils that protect teak wood from weather, pests and rot is always inside the wood. Additional coats of oil added to the exterior won't soak in and penetrate the wood to protect it. In fact, commercial "teak oil" may actually deplete the oils that are there naturally. This is because "teak oil" includes solvents which can break down and damage the natural oils in teak wood. If you decide you want to oil your teak, 100% tung oil or linseed oil is a better choice. Oils may also hold moisture and contaminants that can develop mold and fungus.

If you've already applied teak oil to your teak, don't panic. Just give it a good cleaning to remove the oil, then apply teak protector, or tung or linseed oil if you wish. Another option is to lightly sand the very outer surface layer of the wood. This will expose a new layer of fresh wood that will have a golden tone.

WARRANTY

At Pacific Teak Millworks we are committed not only to providing the most beautiful outdoor grill island cabinetry available, but also the highest quality. We stand behind this claim with a limited 10-Year warranty.

Pacific Teak Millworks warrants to the original purchaser that your outdoor cabinetry will be free of defects in materials and workmanship for a period of ten-years from the original date of purchase. In addition, door hinges are warranted to the original owner for as long as you own your cabinetry, and our drawer glides are covered for a period of 5 years.

For the purposes of this Warranty, "Defects" are defined as imperfections in materials or manufacturing that negatively and significantly impact visual quality, or that impair the use or structural integrity of the product. If a defect is found, we will provide a replacement part or product, or make the appropriate repair as determined proper and appropriate at our sole discretion.

Exclusions.

Natural variations in wood color and grain are natural to "living finishes" and are not considered "defects" under the terms of this warranty. Teak wood will also naturally patina, and change color over time and with normal use. Checking, or slight cracking of teak wood is also a normal and natural occurrence of the wood that will not affect its integrity, and should be expected.

Shipping damage, damage incurred as a result of improper installation, unauthorized modification or repair, and damage due to improper cleaning, misuse or neglect are not covered. Normal wear and tear, or deterioration resulting from the normal, regular use of the cabinetry is also not warranted.

Terms and Conditions.

- This warranty covers only outdoor cabinetry manufactured by Pacific Teak Millworks.
- This warranty applies to the original purchaser of the cabinetry only with proof of purchase.
- If you receive an item that is defective, you MUST contact: info@pacifictcakmillworks.com with the specific issue immediately upon receipt of the defective product.
- Shipping Damage. Items damaged in transit MUST be reported immediately upon receipt of delivery. Your assistance will be required during the claims process.
- All items being exchanged must be sent in original condition, unused in our opinion.
- All returns must be authorized with an RA # (Return Authorization Number) that must be obtained prior to sending back your item. Contact: info@pacifictcakmillworks.com to receive an RA number. A copy of your purchase receipt must be included.
- You are responsible for shipping the item back to us in its original packaging and we do not accept responsibility for lost or damaged packages.
- This warranty does not cover any damage or loss or condition that is beyond the control of Pacific Teak Millworks including but not limited to cases of infestation, negligence, misuse, vandalism, wind damage, hurricanes, tornadoes, floods, fire, earthquake or any other similar acts of Force Majeure.
- Pacific Teak Millworks reserves the right to update or modify these terms and conditions at any time without prior notice.
